WRK 35	= 1 Pc. ML Spinning Walleye 7'0" (Forecast RB 464) includes 7 singlefoot guides and top - cork grips with graphite reel seat.	\$96.57

## REAMERS

Can be used for enlarging holes through cork and EVA handles. Made out of cut-off blank sections for correct taper. Coated with carbide grit. 18" long. Hand ream only.

BIN #	DESCRIPTION	MSRP
HK 1000	Coarse MED-LRG	\$4.30
HK 1001	Coarse MED	\$4.30
HK 1002	Coarse LRG SALT	\$5.50
HK 1003	Fine MED-LRG	\$4.30
HK 1004	Fine LT	\$4.30
HK 1005	Fine UL & FLY	\$4.30

## DREAM REAMER KIT

A simple way to accomplish the difficult task of reaming cork. This kit includes four solid glass tapered shafts with abrasive sandpaper, and one universal handle. The threaded tapered shafts can be used with the handle or a portable drill. Each shaft has a pinned metal sleeve on the base to allow chucking in a low rpm drill. The shaft tapers allow you to ream for just about any blank taper. Each kit comes with a vinyl lined cloth sack for storage and replacement sandpaper. Once the paper wears out, you simply replace it (glue in place on the shaft). They are durable enough to last through the reaming process many times, however, they are not designed to be used manufacturing environment. This is one item the serious custom rod builder can't live without.

HK 1006

MSRP \$59.90

Kit includes four solid glass tapered shafts with abrasive sandpaper and one universal handle.
